Dear Sir/Madam:

DOCKET NO. **1-00000 B-00-0105**

Please note that I live in Gilbert near the proposed "San Tan" power plant expansion that SRP is now looking to expand to four times its original size. When I first moved into the neighborhood, I accepted living near the current facility as it only ran 10-20% of the time and was largely hidden. However, this area of Gilbert is now home to eight schools and over 20,000 residents. It is not an industrial area fit for a plant with more generation than the Hoover Dam, but rather a bedroom community. Unlike the Tempe Kyrene plant, there is no heavy industry in Gilbert to speak of. The vast majority of people moved to Gilbert (and chose to pay the highest property taxes in the Valley) because they do not want to live in an industrial area with the noise and pollution and sheer ugliness that industry brings.

SRP has not paid to have an independent air or environment impact study done by the town or by COST. We do not know what impact this plant will have on our lives, our children's lives or the value of our homes. You should know that many of us have paid thousands of dollars in recent years to move, to furnish our new homes and landscape our yards. Now we are stuck. SRP could have upgraded this facility 5 years ago before our homes were built. They did not do so. Please do not let them do so now that over 20,000 people live across and just down the street.

Please note that if you allow SRP to build this plant, it will set a precedent for years to come. In the last two months well over 1,500 local residents have signed petitions against SRP and this plant. It is not wanted here. SRP has not involved this community in their decision-making process and their select Community Working Group was not elected. I do not accept their decision or opinion as representing my community or me. My HOA Board was not on this Community Working Group nor were they consulted by SRP. What's more, SRP is now involved in popular "slam-polling" telemarketing to "prove" area acceptance of this facility rather than negotiating with those of us who have serious concerns for our families and property values.

I would ask you, as a part of the Arizona Corporation Commission to please withhold granting any permits to SRP until the communities affected have had an opportunity to negotiate with SRP in regards to where this power plant is sited, it's ultimate size and it's effect on the community. I would also like to ask that COST be allowed to speak on my behalf at any and all hearings in regards to San Tan. Thank you for your time and help in this regard.

RECEIVED SRP's BIG SCAM?

ARIZONA CORPORATION
COMMISSION

OCT 31 2000

2000 NOV 16 A 8:07
Controversy continues to rage over the Salt River Project's (SRP) proposed expansion of the SANTAN Generating Plant in Gilbert, to a three stack, 825 megawatt facility, and new issues appear on the horizon. Representatives of the "Citizens Opposing SanTan" (COST) note that the plant will add 790 metric tons of pollutants to the already "brown cloud" airshed of the Phoenix valley. SRP counters with alleged "offsets" to the added pollution as required under Federal Environmental Protection regulations. These are noted to consist of proposed improvements on emissions at existing facilities and the addition of alternative fuel vehicles to their fleet.

Ah yes, alternative fuel vehicles, with all the benefits of big tax incentives stemming from the raid on the state treasury put into motion by the Groscost alternative fuel vehicle bill. That legislation pushed through during the closing hours of last year's legislative session, has already cost the Arizona taxpayers some \$400,000,000.00. The result prior to the special legislative action to call a moratorium? SRP builds an urban power generation plant expansion that will produce sufficient excess power to sell to pricey Southern California markets. At the same time the corporation can claim as offsets to increased pollution from the expanded Santan plant, alternative fuel vehicles in their fleet. They of course would take the outlandish tax incentives for their corporate vehicles, some of which may actually run on the alternative fuel.

The net result? SRP leverages these circumstances to push into the big time power market. As a corporate (and sometimes claimed quasi-government) citizen, SRP gets a failing grade. The Santan expansion in Gilbert is being forced down the throats of local citizens while SRP's exploitation of the alternative fuel tax credit is a financial windfall at the expense of Arizona taxpayers state wide.

Big winner: SRP with a chance to play with the big boys in the deregulated power generation game.

Big losers: Arizona citizens in the Phoenix metro area (and particularly Gilbert) absorbing more pollution into the brown cloud while so called "offsets" to that pollution gain SRP great fiscal benefit while helping to drain the state's tax dollars for gains in the corporate agenda.
